

BioMS Curcumin

INFLAMMATION

Innovative German BioMS nanotechnology, paired with curcumin, opens a pathway for exponential lipid absorption, resulting in beneficial health for many!

*BioMS curcumin is microscopic (30 nanometers) and encapsulated in a micelle carrier. It absorbs directly into the bloodstream, crossing the blood-brain barrier. With 18,000% more bioavailability than native turmeric and being active in the blood within 5 minutes, the goodness of curcumin is absorbed into the cells powerfully and is active for 24 hours.

10 drops of Nanocurcumin with BioMS Technology equates to 80% extract, 8–10 kg of native turmeric root, 1600g of turmeric powder, or 32 capsules of curcumin.

GUT HEALTH

Trust your 'gut feeling'. Your second brain, hidden in the walls of your intestines, is called the enteric nervous system (ENS), which is comprised of more than 100 million nerve cells lining your intestinal tract to your rectum. Communication between the ENS and the Central Nervous System links the cognitive and emotional centres of the brain with peripheral intestinal functions. A healthy gut is essential to maintaining a robust immune system and is an integral part of supporting emotional and mental balance via the production of healthy serotonin levels. Our symbiotic formula is the perfect synergy of medical-grade prebiotics and probiotics. When paired with Nanocurcumin, this powerful duo reduces inflammation and supports optimal health.

CURCUMIN

Turmeric (or Curcuma longa) originated in India and has been documented for over 4,500 years in gastronomy and for over 2,500 years as a homeopathic herb. In India, turmeric is known as "jayanti," which means "one who is victorious over diseases." Thanks to its many wellness benefits, turmeric is considered a sacred plant and a symbol of prosperity and purity.

Pubmed has over 21,000 studies on curcumin and its benefits for inflammatory conditions. Simply type curcumin and the medical condition of interest into the search engine.
